

Dear Valued Patients and Friends,

We are writing you to share some very exciting news concerning our dental practice. After 36 years of solo dental practice here in Two Rivers I have decided to transition the care of my patients and merge with Two Rivers Family Dental effective February 5, 2018.

I want you to know that I have truly enjoyed my time with my patients and staff and have received endless satisfaction and joy from caring for you and your families over the years.

I am happy to announce that Dr. Chris Hansen and his staff from Two Rivers Family Dental will be taking over the care of my patients. Dr. Hansen has been a part of our Two Rivers community for several years and a resident of the Lakeshore community for over 30 years. I have known Dr. Hansen personally and professionally for all that time. I know you will be in good hands; Dr. Hansen has exceptional clinical skills and a wonderful chair side manner. Most importantly, Dr. Hansen truly cares about his patients.

I will be here during the transition and will be working with Dr. Hansen during the merger of our practices, to help him get to know you and your particular dental health needs. Rest assured Jessica, Megan, Missy and Gale will still be here to provide the level of personalized care that you have come to expect. Over the next several months, I will also be helping Dr. Hansen consolidate our practices at our Forest Avenue location.

Many of you were not just patients, but friends, who I looked forward to seeing at each and every visit. Thank you for your kindness, your loyalty, and your trust. I hope you will treat Dr. Hansen as kindly as you did me.

If there are any questions you may have about the transition, feel free to call our office at 794-7100 and Jessica will be happy to answer any of your questions. With these positive changes, we will be able to offer expanded schedules and new services with our combined offices. We are confident that we can continue to provide you and your family with convenient, quality affordable dental care.

Sincerely,

Dr. Michael Furlong
